What is beamČVUT?

- ▶ L^AT_EX beamer theme for presentations related to the Czech Technical University in Prague,
- ▶ which has a *lion on a ladder* graphics in the frame title and on the first page,
- ▶ with customizable frame header and footer logo.

How to use it?

Include `\usetheme{cvut}` in your `.tex` file. That's it!

Institute logo

Frames can show the logo of your institute in the top-right corner.

```
\framegraphic{\includegraphics[height=2em]{%  
  cvut-whitelion.pdf}}
```

Footer logo

Give thanks to the supporting organization by including their logo.

```
\footergraphic{\includegraphics[%  
  [width=.2\paperwidth]{oppa-prague-eu.pdf}}
```

- ▶ **Linux:** Copy the content of the `texmf` directory from the `beamcvut.tar.gz` archive into `~/texmf` directory (in your home folder). Sometimes you have to call `texhash` to help \TeX finding new files.

```
$ cd ~
```

```
$ tar xvf ~/Download/beamcvut*.tar.gz
```

```
$ rm beamcvut.*
```

```
$ cd texmf && texhash
```

- ▶ **Windows:** Heaven only knows! Consult the documentation of your \TeX distribution.

At the moment, there is no “elegant” way of removing the footer from the title frame. If you wish, you can use the following hack:

```
{  
  \setbeamertemplate{footline}{}  
  \frame{\maketitle}  
}
```
